Showing 1-10 of 166 questions Sort by Most Helpful first Newest first \leftarrow Previous 1 2 ... 17 Next \rightarrow Well packaged and easy to set up. Spill over from bottle sitting on top. Good for price.LikesAppearanceTasteFor the houseQualityHelpful?This is a great water dispenser!! Easy to use and fill. A friend has a top loading one and he makes a mess every time he changes the bottle, but with the bottom loader there is no mess!! I can have a cold glass of water or a hot cup of tea whenever I want. I love this dispenser!!! Thank you Primo and Walmart!Helpful?We've been wanting a water dispenser for quite some time, so when I saw the Primo was going to be on sale at Walmart as an early Black Friday item, I decided it was time to get one. I had no issue buying it online. I received the tracking info and notice from Walmart when it shipped. It arrived one day late though that wasn't a Walmart issue, it was a delivery service issue (wasn't really a big deal...only one day late) It was pretty much assembled upon arrival-just had to put the tray in the machine. The free 5 gallon water bottle that was supposed to come with it. I was then given a Walmart gift card for the error which was more than fair. We bought a PRIMO 5 gallon bottle (w/water) the following day. After choosing a spot for the machine, we added the water bottle, it takes an hour for the water to get cold) A switch in the back of the machine allows you to choose from cold and hot water. Hot water takes 12 minutes to heat. There's no mess at all and no spilled water on the floor. I love how thin the machine is, it can fit practically anywhere. Its quiet as well. VERY quiet! Its SO easy to use, there is absolutely NOTHING complicated about it. I do wish we hadnt' waited so long to get it but better late than never! We all use and LOVE it! Its perfect for a home, dorm, apartment, office, etc. HIGHLY recommended!LikesConvenienceFor the houseTasteFitSetupDesignTeaBottom loaderEase of usePerformanceHelpful?who knew these Things were available that you could load from the bottom! I'm an old lady Khama and it's hard so hard for me to pick up those bottles and put them on top of my old machine that I rented for \$18 a quarter. With this one all I have to do is have them deliver The water in the same Room, Then roll it over to the machine. Peel off the top of the bottle put the hose down inside it and I am done! So much easier! I was afraid that the water wouldn't be hot enough or cold enough, but it's wonderful! Why didn't somebody tell me this was available 4 years ago when I started having water delivered?? I've spent enough on rental that I coulda bought it 4 times! I bought the warranty, because I know the machines I got from the company who delivers water break down. If that happens with this one I'm covered!Helpful?As of Now I really have been enjoying the machine. I have only had a few weeks. I Love having the option of cold or hot water at my fingertips. Make sure you use the coupon inside to get your free water. Likes For the houseAppearanceFitTeaPerformanceQualityBottom loaderEase of useFor kidsSetupHelpful? love this water dispenser. I've been drinking so much more water to boil for my tea, it's always ready. Best purchase of the year.LikesBottom loaderTasteFor kidsFor the houseTeaHelpful?The bottom load design is by far the greatest advancement in water dispensers. It has a sleek design and easy to push buttons to conveniently get cold or hot water without accessing the refrigerator. LikesChangeFor the housePerformanceQualityEase of useHelpful?I've only had the product for (1) but I love it so far. I selected this unit because the top loader units are too top heavy and my pets might knock them over. I like that you can shutoff the hot & cold tanks individually. I like the drip container has a full indicator. I absolutely the color because it fits the decor' in my kitchen. Helpful? Great look. Keeps the water ice cold. Only reason I did not give it 5 stars is because it a little noisy. I brought this one to replace my white one that is about 6 years old. This one is much noisier. Helpful? Just arrived today, looks great then plugged it in and water starts POURING OUT all on its own. Shut off, unplug and the only way we can get water to stop is by pushing in on the pour buttons! WHAT...seriously, this has obviously been put together wrong ... Really wanted to love this, never had a bottom load water dispenser before. We are starting return on it and very disappointed!!!!!Helpful? Install Water Bottle . You can clean this dispenser by yourself without any hassle.
